Adobe Photoshop is a vector program with a raster engine. It is a high-end tool that allows you to manipulate an image. With a vector application, you can perform complex transformations without resorting to the raster tools. Photoshop is set up as a vector application, and it's ideal for image editing. Yet, Photoshop's biggest limitation is that it's better suited to raster images. Its canvas is a raster layer. Because of this, you can't

change any pixels that are already in the image. Photoshop layers remove the advantage of vector transformations and can be just as good for raster images. Photoshop was originally released by Adobe in 1993 and is currently a property of Adobe Photoshop CS. Buying a new digital camera or upgrading to a digital camera that will take high-resolution photographs is exciting. Digital cameras allow you to view, print, and archive your work, and share your images with friends and family. There are many different companies offering digital cameras

with different features and prices. A digital camera produces still images and possibly other types of data. The Canon EOS line of cameras is just one example of this many types of cameras. Adobe Photoshop is a versatile image-editing program that many people use for manipulating photographs and sometimes other types of images. You can use it to resize, add effects, and perform different types of image editing. The many different types of digital cameras are best for different types of photography. When you are looking for a camera, you need to

decide what type of photography you want to do. If you are interested in digital photography, you will use a digital camera. Adobe Photoshop, originally called Adobe Photoshop Image Editor, is a cross-platform, advanced image-editing program designed by Adobe Systems. There are other products from Adobe that offer image-editing capabilities. Adobe Photoshop is designed for professionals, but it is useful for those who want to try their hand at image editing. It has a lot of features to help you with graphics and web design, as well as many other tasks.

Pages Thursday, September 4, 2014 Labor Day sees a rise in body bracelets in STEM classes Over the Labor Day weekend, we held the first day of school in the new building and our Common Core science standards focus on the function of the plant and animal body. In STEM classes, students get to read several fun books. Some, like

the classic "Where's Waldo" by Martin Handford, are well-known classics. Others, like "The 7 Habits of Highly Effective People" by Stephen Covey, are relatively unknown to many parents. Students are asked to read the books and discuss them. These discussions guide students into using scientific processes to investigate how the body works and develops. More concretely, these books emphasize the importance of caring for our bodies. While the body is not explicitly covered in the science standards, the discussions students

have had about the books are a great way to get them thinking about the importance of caring for our bodies. Because of the focus on function, caring for the body also leads to discussions about how to treat others. We are particularly proud of a particular aspect of this new building. Instead of using desks, students sit in groupings and sit on cushions. Their workstations can be close together, making learning as comfortable as possible. This difference is a simple shift from traditional classrooms, where students are separated and have their

workstations in the middle of the room. As we shift into the 2014-2015 school year, we expect to continue to emphasize the importance of caring for our bodies. This is another step in our expansion of providing more opportunities for students to learn in a way that provides the most comfort and meets the learning needs of students. No comments: Post a Comment SUCCESS STORIES Students Learn How to Resolve Conflict Part of our fourth grade teachers' professional development included a session focused on conflict

resolution. Conflict usually means arguing over a disagreement. In this session, we looked at conflict in a different way: we learned that conflict and resolution are part of a person's growth. The skills students learned were presented in the worksheet, "What Makes You Tick." Fourth grade teacher, Heidi Cook, organized the session for her class. According to Cook, "The goal of the session was for students to gain an understanding of the universal, natural part of growth - conflict - and the process of resolving it. These skills
